

# Instructional Planning Before the CFA

*Planning instruction with the end in mind.*

## Why this meeting matters

PLC Right is not just about looking at data after students fail. It is also about improving instruction before the assessment happens.

Meeting 11 • Wednesday, February 3, 2027 • 45 minutes

|            |                                                                                |
|------------|--------------------------------------------------------------------------------|
| Focus      | What instructional practices will give students the best chance to learn this? |
| Leave with | Instructional plan connected to learning targets.                              |

## Agenda — step by step

| Time      | What the team does                                                         |
|-----------|----------------------------------------------------------------------------|
| 0–5 min   | Review the CFA & targets. Re-anchor on what you're teaching toward.        |
| 5–20 min  | Share strategies. Swap instructional approaches for each target.           |
| 20–30 min | Anticipate gaps. Name likely misconceptions and prerequisite skills.       |
| 30–40 min | Plan checks for understanding. How will you check learning before the CFA? |
| 40–45 min | Confirm the plan. Lock the teaching window and the CFA date.               |
