

Mid-Cycle Check and Troubleshooting

Buffer meeting during instruction.

Why this meeting matters

This is the third intentional buffer. It reinforces that PLC work is not just "teach, test, sort." Teams should adjust instruction while learning is still happening.

It's also the mid-year check-in on the team itself: re-score the Collaborative Team Rubric, compare to your Meeting 3 baseline, and name where you've grown. Same mirror, not a grade.

Meeting 12 · Wednesday, February 17, 2027 · 45 minutes

Focus	What are we noticing before the assessment?
Leave with	Instructional adjustment plan before the CFA.

Agenda — step by step

Time	What the team does
0–5 min	Re-score your teamwork. Take the Collaborative Team Rubric again and compare to your Meeting 3 baseline — where has the team grown? Celebrate the movement, then pick the next descriptor to push. Still a mirror, not a grade.
5–15 min	Share what you're seeing. Bring early evidence of student understanding.
15–30 min	Name the misconceptions. What are students getting wrong so far?
30–40 min	Adjust now. Change instruction while there's still time to help.
40–48 min	Confirm CFA logistics. Nail down when and how you'll give it.
48–50 min	Agree on data. Decide what each teacher brings after the CFA.
