

Reset and Readiness Check

Buffer meeting for culture, clarity, and questions.

Why this meeting matters

This is the first intentional buffer. Some teams will still be confused, skeptical, or waiting to be told exactly what to do. This meeting prevents teams from moving forward without clarity.

It's also where the Meeting 2 foundation gets finished: refine your roles and norms and complete the accountability worksheet, so the way your team works is settled before the learning cycle begins.

Then the team looks forward: the Four Critical Questions readiness tool gives an honest read on where you're ready for the cycle and where you still need support — so no one moves into the content work pretending. The standards work itself begins next time, at Meeting 5.

Meeting 4 · Wednesday, September 23, 2026 · 45 minutes

Focus	Are we ready to begin the actual learning cycle?
Leave with	A finalized team foundation and a completed readiness check for the cycle.

Agenda — step by step

Time	What the team does
0–10 min	Clear up confusion. Revisit anything unclear from Meetings 1–3. This pause is planned, not lost time.
10–25 min	Finalize your team foundation. Refine the roles and norms you drafted in Meeting 2, and complete the Holding Each Other Accountable worksheet if it was a first pass. This locks in how you'll work before content begins.
25–40 min	Readiness check. Use the Four Critical Questions readiness tool to name, question by question, where the team is ready for the cycle and where it still needs support. Be honest — this is what keeps teams from moving forward while pretending.
40–45 min	Assign pre-work. Decide what standards and materials everyone brings to Meeting 5, where the standards work begins.

Where we're going next → Meeting 5

Identifying Essential Standards — PLC Question 1: What do we want students to learn?
