

The Road to PLC Right

A shared map of where our teams are headed — this year, and the years beyond.
The journey from *holding* PLC meetings to *being* a Professional Learning Community that ensures every student learns.

OUR DESTINATION

Three big ideas we're driving toward

Everything this year points at these. They're the difference between a school that *does* PLCs and a school that *is* one.

1

A focus on learning

We measure success by what students learn, not only by what we teach.

2

A collaborative culture

Teams work interdependently and share responsibility for every student.

3

A results orientation

Evidence of student learning — not adult preference — drives our next move.

Guided by four questions: What should students learn? · How will we know? · How do we respond when they don't? · How do we extend when they already have?

THE SHIFT

What changes as we travel

Planning activities → Clarifying learning

Sharing opinions → Analyzing evidence

"My students" → "Our students"

Intervention as optional help → Intervention as a team response

THIS YEAR · ONE HONEST CYCLE

18 meetings. One complete learning cycle.

We meet 45 minutes every other Wednesday. This year isn't about doing everything — it's about completing **one** authentic cycle together and learning where we get stuck.

1

PHASE 1 · MEETINGS 1–4

Foundations & culture

Why PLC Right, and why now. Set team norms and roles, and take an honest look at where we are.

2

PHASE 2 · MEETINGS 5–8

What should students learn?

Choose one essential standard, break it into learning targets, and agree on what proficiency looks like.

3

PHASE 3 • MEETINGS 9–12**How will we know?**

Build and quality-check a common formative assessment, then teach with the end in mind.

**MEETING 13 • THE TURNING POINT****We read the evidence — together**

The shift from "I taught it" to "did they learn it?" Everything before builds clarity; everything after is PLC Right in action.

4

PHASE 4 • MEETINGS 13–18**Respond & reflect**

Intervene for students who need more, extend for those who are ready, reassess, and reflect on our own practice.

**DESTINATION****One complete, authentic PLC cycle**

By June, every team can show a full cycle — and has the habits to run the next one faster and better.

THE HORIZON

From PLC Lite to PLC Right — over time, not overnight

We're not undoing 15 years of PLT Lite in a single semester. Here's the multi-year climb.

PLC LITE

PLC RIGHT

Year 1**THIS YEAR****Experience it once**

Complete one honest cycle. Build norms, clarity, and the habit of using evidence together — proof to ourselves that the work pays off for students.

Year 2**NEXT****Make it routine**

Run more than one cycle across units. Sharpen essential standards and common assessments. Strengthen team-based intervention and extension. Set measurable SMART goals.

Year 3+**THE VISION****Live it**

Continuous cycles are simply how we work. A schoolwide system of timely support and extension for every student. Collective responsibility, shared by all. We don't *do* PLCs — we *are* one.

This year is not about perfection. It's about completing one honest cycle, learning from it, and proving the hard work shows up in what our students learn.
